

Javonta Young

Assignment 8.2

The image displays two screenshots of a Visual Studio Code (VS Code) editor window, showing a Python script and its execution output in the terminal.

Top Screenshot:

- The editor shows a file named `movies_update_and_delete.py` with the following code:

```
38 else:  
39     print(err)  
40  
41  
42 finally:  
43     cursor = db.cursor()  
44     show_films(cursor, 'DISPLAYING FILMS')
```

- The terminal output shows the results of the script execution:

```
Director: F. Gary Gray  
Genre Name ID: Drama  
Studio Name: New Line Cinema  
  
-- -- DISPLAYING FILMS AFTER UPDATE -- --  
File Name: Get Out  
Director: Jordan Peele  
Genre Name ID: Horror  
Studio Name: Blumhouse Productions  
  
File Name: Gladiator  
Director: Ridley Scott  
Genre Name ID: Drama  
Studio Name: Universal Pictures  
  
File Name: Alien  
Director: Ridley Scott  
Genre Name ID: Drama  
Studio Name: 20th Century Fox  
  
File Name: Friday  
Director: F. Gary Gray  
Genre Name ID: Drama  
Studio Name: New Line Cinema  
  
-- -- DISPLAYING FILMS AFTER DELETE -- --  
File Name: Alien  
Director: Ridley Scott  
Genre Name ID: Drama  
Studio Name: 20th Century Fox  
  
File Name: Get Out  
Director: Jordan Peele  
Genre Name ID: Horror  
Studio Name: Blumhouse Productions  
  
File Name: Friday  
Director: F. Gary Gray  
Genre Name ID: Drama  
Studio Name: New Line Cinema
```

Bottom Screenshot:

- The editor shows the same file `movies_update_and_delete.py` with the following code:

```
38 else:  
39     print(err)  
40  
41  
42 finally:  
43     cursor = db.cursor()  
44     show_films(cursor, 'DISPLAYING FILMS')
```

- The terminal output shows the results of the script execution:

```
